Completed 4k road miles, 1k miles running in. Mapped by the late Simon Roe (JGM)  1.9 bar running vpower @ 525bhp/490lbsft - 2.1bar 575bhp/520lbsft Vpower/meth. The car never ran more than 525bhp after the day of mapping as frankly it didnt need any more on the road. 3 changes of Motul Comp 300V in that timeframe. All parts fitted were brand new.  New EJ257 block (Pinned – if you're unfamiliar with this, is vastly stronger than an OEM block)  New EJ257 crankshaft  ACL race series main bearings  ACL race series big end bearings  Lateral Crower "long" H section forged con-rods  Lateral Wiseco custom pistons  ARP head bolts  RCM modified oil pump  Cosworth sump baffle plate  XWORKSS baffled sump  Cylinder heads  JDM "Big Port" Spec C heads (modified by FE with custom CNC combustion chambers for 100mm bore, de shrouded plug areas) smoothed/flowed ports/polish)  Supertech Stainless/Nitrided intake valves  Supertech Inconel exhaust valves  JDM Spec C cams
