

advantage extreme

high performance brake kit

advantage extreme red label brake kits benefit from our experience in top level motorsport to provide enhanced brake performance in a specially designed direct replacement package.

advantage extreme

high performance brake kit

Designed to provide the ultimate braking performance in a direct replacement package, this **advantage extreme red label** brake kit features technology derived from Alcon's involvement in top level motorsport, including F1, World Rally Championship, NASCAR and Japanese GT racing.

Discs

- Two piece design featuring aerospace specification alloy bells for high strength with minimum weight
- Discs of unique iron alloy developed by Alcon to provide an optimum combination of bite, thermal stability and durability
- Unique crescent grooves on friction faces provide the bite usually associated with drilled discs without the attendant durability problems
- Directional curved cooling vanes for optimum cooling performance
- Alcon's floating disc system (as used in the majority of applications) has been designed to allow thermal expansion of the disc throughout its life while minimising the tendency to judder

Calipers

- Gravity die cast in aluminium alloy for optimum strength and weight
- Monobloc 4 or 6 piston design for high stiffness (firm pedal) with low weight
- Piston bore sizes are staggered to ensure even pad wear
- Pin-mounted pads provide low threshold pressure and low noise

Pads

- Formulated for excellent resistance to fade at elevated temperatures
- Strong cold performance for start up and city driving
- Low noise

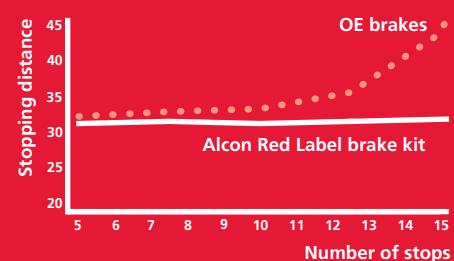

Hardware

No additional parts are required to fit this **advantage extreme red label** kit to your car - all brackets, fixings, braided hoses and high performance brake fluid are included.

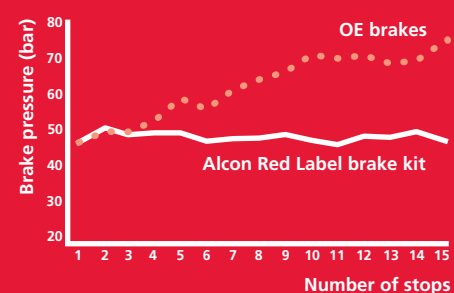

NB

Please check that your wheels are compatible with the **advantage extreme red label** brake kit by obtaining a radial profile template from your dealer.

STOPPING DISTANCE (METRES)
OVER CONSECUTIVE STOPS
FROM 100KPH (62MPH)

HIGH SPEED FADE TEST
OVER CONSECUTIVE STOPS
MAINTAINING 0.7g

PLEASE NOTE:

This box is one of two required to complete an Alcon **advantage extreme** brake kit. Each box contains a left or right hand half kit. Please check the identification labels on both boxes to ensure you have matching left and right hand half kits.
